Detail Page:

Users > John Johnson > Animals

DETAILS

Owner: John Johnson
Breed: Merino
Birthdate: 2021-05-17
Sex: ewe

[edit details](#)

Vaccinations:

Name	date administered
8-way	2021-09-22
Chlamydia psittaci ewe vaccine	2021-08-13

[+ add/edit vaccination](#)

On this page, a user can view all the details of a specific animal, as specified in the given dataset. From this page, users can also edit the details of the animal by pressing the “edit details button”, or edit their vaccination records by pressing the “+ add/edit vaccination.”

Edit Information Page:

Users > John Johnson > Animals

Owner:

Breed:

Birthdate:

Sex:

DETAILS

Vaccinations:

Name	date administered
8-way	2021-09-22
Chlamydia psittaci ewe vaccine	2021-08-13

On this page, the text for owner, breed, birthdate, and sex have all been replaced with fillable text boxes that users can edit. If the “save changes” button is pressed, the text in each of the text boxes will be saved and shown on the Details page. If the “cancel” button is pressed, all changes are discarded and the user is returned to the Details page.

Add Vaccination Page:

Users > John Johnson > Animals

Owner: John Johnson

Breed: Merino

Birthdate: 2021-05-17

Sex: ewe

DETAILS

Vaccinations:

	Name	date administered
<input type="button" value="X"/>	8-way	<input type="text" value="2021-09-22"/>
<input type="button" value="X"/>	Chlamydia psittaci ewe vaccine	<input type="text" value="2021-09-22"/>
	new vaccination	<input type="text" value="yyyy-mm-dd"/>

On this page, users can edit any existing vaccination records by typing in the fillable fields, add a new vaccination record by typing in the “new vaccination” and “yyyy-mm-dd” fields, and remove existing records by pressing the “X” button next to each record. If more vaccination records are added than can be displayed at once, a scroll bar will be added to the side of the

vaccinations window. If the “save changes” button is pressed, all of the changes made in this section will be saved and applied to the Details page. If the “new vaccination” and “yyyy-mm-dd” fields are left empty, they will be discarded. If the “cancel” button is pressed, all changes are discarded and the user is returned to the Details page.
